Allergy & Asthma in the UK

Legislation For Schools

ADRENALINE AUTO-INJECTORS

Since October 2017, the Human Medicines (Amendment) Regulations 2017 changed allowing schools to obtain, without prescription, adrenaline auto injector devices for emergency use on children who are at risk of anaphylaxis but whose own device is not available or not working.

SALBUTAMOL INHALERS

Since October 2014 UK schools have been permitted to purchase salbutamol inhalers without a prescription for use in emergencies when a child with asthma cannot access their own inhaler.

ARK Anaphylaxis & Asthma Kits

ARK kits have been developed in partnership with Allergy UK, designed in partnership with Arcadia Medical, with advice from specialist healthcare professionals
